Handcrafted at our factory in Fall River, MA.

# SPIN

---

Comprised of three distinct shapes, the Spin Pendants reflect timeless form and are designed to elevate the atmosphere of any architectural space. Every detail has been considered and executed with a designer's eye, including CNC precision machined finials, minimalistic mounting, soft etch lensing, and no visible hardware. The Spin pendants are truly one of the most refined pendant luminaire series available, and are made by hand in America.

At Spectrum we have always charted our own course, with deep lighting knowledge to share and an appetite for discovering new possibilities. Our independence gives us the freedom to explore and be responsive, and our desire to listen and truly understand your needs allows us to guide you to remarkable results.

## SIGNATURE SERIES SPIN PENDANTS

- The three luminaires present unique visual profiles, each with their own particular beam distribution that provide solutions to a diverse range of challenges within interior architecture.
- Slim field cuttable cord and thin magnetic canopies offer functional support. When combined with the rest of the fixture, these parts create a captivating visual effect where everything above the shade appears to vanish into the ceiling. This allows the focus to remain solely on these elegant shades.
- Available with outputs up to 3000 delivered lumens along with efficacies reaching 108 LPW.
- No visible hardware provides seamless aesthetics and refined craftsmanship.
- A precision machined finial gracefully complements the apex of the shades creating a flawless pinnacle.
- Every shade in the Spin series is hand spun and embodies a blend of craftsmanship and character that redefines the essence of excellence.
- Diffused lenses are designed to seamlessly mold to the distinct contours of each shade.
