

WARNING: Be certain all power is OFF! Wire according to local and national codes. This product should be installed by a qualified electrician.

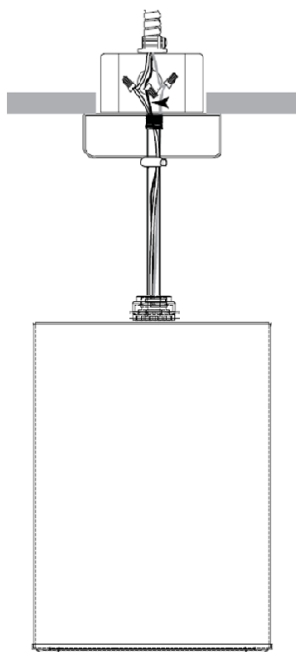

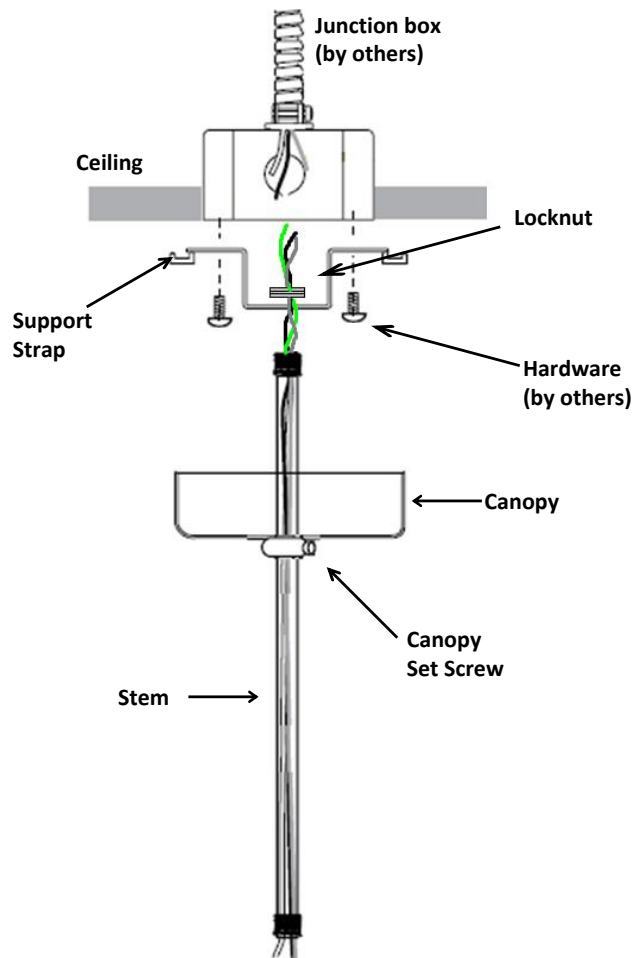

Notes prior to beginning installation:

A) Slide the Stem through the center Canopy opening & install Stem to fixture, bringing conductors through Stem.

B) Loosely thread on Locknut to top of Stem.

Installation Instructions:

1. Mount the Support Strap to the Junction Box (by others). Mounting Strap is for a standard 3.5" junction box.
2. Slide the Stem/Locknut Assembly through the side of the Support Strap, and tighten to Support Strap.
3. Make wiring connections between Stem & Junction Box. Green ground screw provided; attached to Support Strap.
4. Raise Canopy to Support Strap & thread Canopy Set Screw to Stem.

Picture only for reference

Important: Fixture has been factory wired, ready for installation.
