

**ENVIRO-PRO ANODIC POWDER ARCHITECTURAL FINISHES**

**CLASSIC ANODIZED ALZAK FINISHES**

Spectrum Lighting runs a state of the art powder coat process with a five stage chromate pretreat and multi stage oven. Three booths are fed so we are able to run multiple colors on any given day. Spectrum also has a custom "wet" booth for special finishes and paints. Colors shown are printed versions of the Spectrum paint and powder coat colors. Please note that no printed image can equal the exact color of finish on metal.
