

CR2 LONG

FIVE NEW LENGTHS

SAME GREAT PERFORMANCE - SAME SMALL DIAMETER

What began as a compact architectural cylinder with a 2" aperture and 8" body is now expanding with the introduction of the CR2 Long, bringing additional lengths and greater design flexibility to the series. Building on the same philosophy of clean form, precision optics, and versatile mounting, the CR2 Long can be specified as Pendant, Surface or Wall Mount. Mix and match with different sizes or integrate our BLANK (no led) option for unique specifications and creating chandelier effects.

With its slender 2" diameter and elongated profile, the CR2 Long delivers powerful lumen packages, multiple beam distributions, and flexible color temperature options. It integrates cleanly into the ceiling plane while providing precise illumination, giving designers a refined tool for shaping light without distracting from the surrounding architecture.

The CR2 Long is compatible with all major architectural dimming systems, providing reliable control and flexibility. Designed with sustainability in mind, it is Energy Star approved, California Title 24 compliant, and constructed with low-energy components and recyclable materials.

At Spectrum Lighting, most fixtures, including the CR2 Long, are manufactured in the United States at our Fall River, Massachusetts facility. The CR2 Long is BABA compliant for federally funded projects, and reflects our commitment to Right to Repair with durable, serviceable designs supported by accessible parts and repair information.

NEW LENGTHS - THE CR2 HAS GROWN

1. COB LED, 2SDCM, multiple CRI and lumen packages.
2. Five optics available, including wall wash.
3. Optical effect holding spring.
4. Multiple optical effect lenses available.
5. Hex Cell optical effect.
6. Multiple bezels available, standard bezel shown.

CR2 LONG

FIVE NEW LENGTHS

SAME GREAT PERFORMANCE - SAME SMALL DIAMETER

The CR2 Long expands the CR2 family with five new cylinder lengths: 12", 18", 24", 36", and 48", allowing designers to scale the fixture to the architecture while maintaining the signature 2" diameter. Blank (no LED) option also available. Suitable for both wall and ceiling mounting, the extended proportions create options ranging from subtle cylinders to stronger vertical statements, all while preserving the clean aesthetic of the CR2 series.
